COMMUNITY HEALTH AREA OF CONCENTRATION, ARTS AND SCIENCES AA: 186A

Total Credits: 60
Catalog Edition: 2020-2021

Program Description

(R): 186A

This AA area of concentration prepares students to enter a diverse, people-oriented field in which professionals work to promote lifestyle wellness and improve the health status of society. Health educators assist people in making responsible decisions and changing behaviors to achieve a healthier lifestyle.

Professionals in this fast-growing field are employed by public and private health care organizations, government agencies, hospital wellness centers, corporate-based worksite health programs, college and university health service centers, insurance companies, private health promotion corporations, drug and alcohol rehabilitation programs, family planning agencies, and health clinics, and as education representatives for textbook publishers and pharmaceutical companies. Graduates with school health degrees teach on the elementary, secondary, and college levels, in both private and public school settings. School health educators also qualify to work in many community and governmental agencies. Job titles include patient educators, health program managers, health education teachers, community health organizers, health promotion directors, and wellness coordinators.

Program Outcomes

Upon completion of this program a student will be able to:

• Describe biological, psychological, environmental, and social factors that influence health.
• Explain the impact of individual behavior on health status.
• Define health education and list the skills/competencies of the entry level health educator.
• Develop a health education intervention based on the assessment of controllable and noncontrollable risk factors that impact health.
