CAD FOR THE BUILDING PROFESSIONAL CERTIFICATE: 203
Total Credits: 27
Catalog Edition: 2020-2021

Program Description
(R): 203

This certificate curriculum prepares students for entry-level positions in architectural firms or construction-related businesses by providing an opportunity to learn computer-aided drafting (CAD) skills, while developing a preliminary understanding of building technology. This curriculum also serves professionals currently in the architectural field who are seeking career advancement through the development of intensive technical and creative CAD skills and experience. These courses can be applied to the architectural technology AAS area of concentration.

Program Outcomes
Upon completion of this program a student will be able to:

• Prepare construction documents in a variety of formats including hand drafting, 2D CAD [computer-aided drafting], 3D presentation and rendering, and 3D object based modeling.
• Demonstrate a thorough understanding of construction details and building sections.
• Differentiate between BIM software and non-object CAD software.
• Describe construction details in BIM documents.
• Prepare BIM construction documents based on designs submitted by employers or clients.
• Revise BIM construction documents.
• Arrange construction information in a BIM format.
