ENVIRONMENTAL HORTICULTURE AND SUSTAINABLE AGRIBUSINESS AAS
Total Credits: 60
Catalog Edition: 2023-2024

Program Description
(G): 361

This program provides the student with a comprehensive mixture of academic and practical training in the field of environmental horticulture. The flexible curriculum can accommodate career interests in either landscape contracting or design. Students will learn to design and draft landscape plans; install, construct, and maintain landscapes; and identify, select, and plant woody and herbaceous plants.

Career opportunities include positions as landscape supervisors, nursery managers, landscape contractors, and landscape designers. This program will also serve to expand the knowledge and skills of persons already working in the profession and give the student enough knowledge and experience to establish a private landscape, grounds maintenance, nursery, or greenhouse business.

Courses include general education requirements, those necessary for acquiring landscaping fundamentals, and those that reinforce the student’s area of interest in landscape contracting or landscape design. This program is approved by the Landscape Contractors Association.

Program Outcomes
Upon completion of this program, a student will be able to:

- Design, draft, and implement landscape plans.
- Install, construct, and maintain landscapes.
- Identify common plants in Maryland landscapes.
- Identify, communicate, and solve common problems in the landscape or in production.

Program Advisors
Rockville
