Program Description
The chemistry and biochemistry program is designed to provide the first two years of courses necessary to obtain a chemistry or biochemistry baccalaureate degree from a four-year college or university. In addition to general and organic chemistry knowledge, students will be trained in data collection and analysis, and scientific communication. Through the laboratory portion of the program, students will reinforce their understanding and application of the theory learned in class, develop laboratory skills and techniques, and formulate conclusions based on observations. Students are strongly encouraged to work with an adviser in course selection as transfer requirements between four-year institutions may differ.

Program Outcomes
Upon completion of this program a student will be able to:

• Apply knowledge of general and organic chemistry to analyze data, draw conclusions, and solve problems.
• Apply safe practices to execute laboratory techniques and use appropriate equipment and instrumentation to carry out experimental procedures.
• Access scientific information using basic scientific references and literature and evaluate technical information critically.
• Communicate in an ethical, clear and organized manner, scientific concepts, experimental results, and properly cited reference material.
• Work effectively in groups, as leaders or team members, to solve problems and interact productively with a diverse group of peers.

**Total Credit Hours: 60**

* ENGL 101/ENGL 101A, if needed for ENGL 102/ENGL 103, or choose elective

** Behavioral and Social Science Distribution (BSSD) courses must come from different disciplines.

Choose one distribution course that also fulfills the Global and Cultural Perspectives requirement.

‡ It is recommended that COMM 108 be taken as the HUMD distribution elective.
Transfer Opportunities
Montgomery College has partnerships with multiple four-year institutions and the tools to help you transfer. To learn more, please visit https://www.montgomerycollege.edu/transfer or http://artsys.usmd.edu.
